Group Assignment

You are provided with two datasets containing information in a CSV file. The datasets have the following issues:

1) Missing values / Empty cells
2) Inconsistent date formats
3) Duplicate rows.
4) Wrong data
5) Unnecessary columns that are not relevant to the analysis.

Write pandas scripts to clean these datasets by addressing each of the issues mentioned above.

Provide the cleaned dataset as the output of your scripts

N.B This question covers multiple common data cleaning tasks and requires a thorough understanding of pandas functionalities to address them effectively.

N.B To be presented physically on Monday 1st July, 2024 during class time.
